American action against Osama bin Laden
WHAT DOES THE WORLD THINK?

Gallup International poll (*conducted in association with WIN*) in 25 countries across the globe,
May 11—June 2, 2011

Contents

Highlights

- 1- Views on the Operation: Support, Qualified Support and Opposition
- 2- Credibility about the operation: Was it Real or Staged?
- 3- Expected Impact on World-wide Terrorism
- 4- Impact of the operation on views about President Obama
- 5- Analysis by Region and Religion
- 6- Analysis by 4 Types of Respondents: Full Supporters, Qualified Supporters, Opponents and the Undecided
- 7- Methods Report

American action against Osama bin Laden
WHAT DOES THE WORLD THINK?

Gallup International poll (conducted in association with WIN) in 25 countries across the globe,
May 11—June 2, 2011

Highlights

1- Views on the Operation: Global majority gives full (39%) or qualified support (42%)

Only 9% expressed opposition to the operation 81% supported either fully (39%) or gave a qualified support (42%); 10% did not respond.

Those giving qualified support said they disapproved of the manner of the operation (15%) or that they would have preferred to see Osama Bin Laden arrested rather than killed on the spot (27%).

2- Real or Staged: Only half convinced the man killed was Osama Bin Laden

Despite the high level of global approval for American action against Osama Bin Laden, only half (53%) are fully convinced about its authenticity and say the man killed in the operation was Osama Bin Laden; as many as 23% dispute it and 24% say they do not know or did not respond.

3- Hope and Skepticism about Impact on World-Wide Terrorism: Only 19% believe world-wide terrorism will decline after Osama

19% say they expect world-wide terrorism to decline after the death of Osama Bin Laden while 38% expect world-wide terrorism to increase. However a sizeable 30% say it will remain unchanged. The remaining 13% gave no response or other responses.

4- Impact on views about President Obama: Obama gains 27% and loses 17% on favorability

At a global level President Obama's image improved in the eyes of 27%, damaged among 17% and remained unchanged among 45%. The rest 11% gave other responses or did not respond.

American action against Osama bin Laden
WHAT DOES THE WORLD THINK?

Gallup International poll (*conducted in association with WIN*) in 25 countries across the globe,
May 11—June 2, 2011

Methodology:

The 25 country poll included in this study are based on national probability samples, conducted **face to face** (in 11 countries; n=10,300); **telephone** (in 7 countries; n=4,909) and online (in 7 countries; n=5,786). Altogether the sample size was 20,995. Wherever needed samples have been weighted to census distribution covered for each country in the study (see details ahead). In 7 countries (details provided ahead) the surveyed population did not include all or parts of rural areas. Field work was conducted during May 11-June 2, 2011. The error margin depends on the size and type of sample used in every country. But in general the size and types of samples used in this study will have an error margin of $\pm 2-5\%$ at 95% confidence level.

American action against Osama bin Laden **WHAT DOES THE WORLD THINK?**

Gallup International poll (conducted in association with WIN) in 25 countries across the globe,
May 11—June 2, 2011

Table 1

Question1: There are at least four views on the killing of Osama bin Laden. Some people have supported his killing; some have supported the killing but disagreed with the manner in which it was done by American soldiers; others say they favor arresting Osama but not killing him, still others have opposed the killing of Osama Bin Laden. What is your view? *ONE ANSWER*

Percent of Respondents

	All Unweighted Count	Support			Oppose	No Response	
		In support of the killing	In support of the killing but disagree with the manner	Was in favor of arresting Osama but not killing him	Oppose the killing	Did not hear of the Incident	Don't Know / No Response

SURVEY METHOD

UNIVERSE

The Universe is Global population. The survey was carried out in 25 countries. **The population of these 25 countries comprise 59% of global population.**

For the purposes of this survey the standard/conventional approach was followed: each country has been treated as an independent universe. The sample selected to be interviewed in each country are representative of the adult population of the country. In a few countries interviews were limited to the major cities (*notably China and India*). In such cases the limitation has been indicated in the section below which provides details on country level sample size.

SAMPLING METHODS

Probability sampling methods have been used in all the polled countries. Further details can be provided upon request. In general multi-stage stratified sampling methods have been employed. The error margins are in the range of $\pm 3-5\%$ at 95% confidence level.

INTERVIEWING METHODS

The Interviewing Methods are specific to each country. Details are provided below in the country level sampling and interviewing details. The Methods can generally be described as Multi-Mode. They include Face to Face, Telephone and Online interviews depending on the country.

WEIGHTING SCHEME:

- 1- For Global Averages only that population has been treated as the polled universe where the survey was conducted. This means that if (*such as in China*) only major urban centers were interviewed, only those populations are treated as the relevant population for developing the weights. Details are available at the end of this Report. Further details can be available upon request. The issue of weighting in determining global averages is under deliberation in our team and we will be happy to share our thoughts with the interested scientific and professional community.
- 2- A number of countries have used weights for their national level data. Details can be available upon request.
- 3- The country level averages which appear in this Report are weighted averages.

For Details on Methodology for each country, please see ahead:

Note: * In Algeria and Tunisia the survey was done by BJ Group (WIN-GIA affiliate in Morocco email contact: bjconsult@menara.ma) subsequently the survey in Tunisia was also done by EMRHOD International (WIN-GIA affiliate in Tunisia email contact: emrhod@gnet.tn; contact person: Nebil Belaam). The data by EMRHOD International could not be included in this Report due to a set of logistical issues. The efforts by EMRHOD International, the sole affiliate of WIN-GIA in Tunisia are however duly appreciated. In India and Bangladesh the survey was done by friendly institutions, not affiliated with WIN-GIA; their contribution is greatly appreciated.
