CHANGING LIFESTYLES AND HABITES

Use of tobacco and Cigarette smoking (Part 1)

This is a six part series on the use of tobacco in various forms, especially cigarette smoking. Part 1 deals with claimed incidence of smoking cigarettes among males and females of Pakistan. Parts 2,3 and 4 deal with use of tobacco in other traditional forms, namely 'Naswar', 'Huqqa (Sheesha)' and 'Paan (Betel nut)'. Part 5 deals with perceived effect of use of tobacco on health while part 6 deals with perceived effect of use of tobacco and cigarette on the person's social standing.

30 % of Pakistani males claim to smoke cigarettes; claimed incidence among females is only 2 % . GILANI POLL / GALLUP PAKISTAN

Islamabad, September 23, 2011

The results of a Gilani Research Foundation Survey carried out by Gallup Pakistan revealed that 30% of Pakistani males claim to smoke cigarettes. However the percentage of claimed incidence among females is much smaller at only 2%.

In a survey a nationally representative sample of men and women from across the four provinces were asked the following question: "Have you smoked 100 cigarettes (five packs) approximately, in your entire life or not?" Among the male population, 30% of the respondents claimed to have smoked cigarettes and 66% stated that they do not smoke cigarettes. 4% chose not to respond.
