51 % Pakistanis believe that the most important reason for variations in amount of rainfall is global climate change. (GRF POLL)

Islamabad, March 29, 2016

According to a Gilani Research Foundation Survey carried out by Gallup Pakistan, 51% Pakistanis believe that the most important reason for variations in amount of rainfall is global climate change.

A nationally representative sample of men and women from across the four provinces was asked, “In your opinion, what is the most important reason for little or no rain?” In response, 51% said that it is global climate change while 45% said that it is God’s punishment. 4% did not respond.

Question: “In your opinion, what is the most important reason for little or no rain?”
