26% of Pakistanis believe switching to 'Energy Saver' light bulbs can be their single best personal contribution to help save energy: GILANI POLL/GALLUP PAKISTAN

Islamabad November 2, 2011

The results of a Gilani Research Foundation Survey carried out by Gallup Pakistan revealed that 26% of Pakistanis believe switching to 'Energy Saver' light bulbs can be their single best personal contribution to help save energy.

In a survey a nationally representative sample of men and women from across the four provinces the respondents were asked to choose from four different methods of their personal contribution to help save energy in their country. They were to choose only one of those four methods; the one they considered would be their best way of contributing to the save energy campaign. Responding to this 44% said that they will support by switching off the unnecessary lights, 15% will decrease use of AC/Cooler; 13% said that they will help spread awareness about energy saving methods; whereas 26% said that they will use energy savers at home. However 2% did not give a view. It should be noted as background information that currently Pakistan is undergoing a severe power shortage crisis.

Question: "How can you support the government in 'Energy Saving Campaign'? Kindly tell that personally which one will you stress more out of the following four?"

Majority of Pakistanis (53%) believe their participation in 'save energy campaigns' would equally benefit them and the government. The rest are split between those who believe the principal beneficiary will be the government (26%) and others believing it will be the individual Consumer of Electricity (20%): GILANI POLL/GALLUP PAKISTAN

Islamabad November 3, 2011

The results of a Gilani Research Foundation Survey carried out by Gallup Pakistan revealed that majority of Pakistanis (53%) believe their participation in 'save energy campaigns' would equally benefit them and the government. The rest are split between those who believe the principal beneficiary will be the government (26%) and others believing it will be the individual Consumer of Electricity (20%).

In a survey a nationally representative sample of men and women from across the four provinces the respondents were asked "In your opinion, such campaign will give more benefit to the government; you or both will have the equal benefit?" Responding to this 26% said that the government will be more beneficial of such 'Energy Saving Campaign'; 20% think that they themselves will be benefitted whereas 53% think that both the government and public will be benefitted by such campaigns. However 1% did not give a view.

Question: "In your opinion, such campaign will give more benefit to the government; you or both will have the equal benefit?"

Divided views on the future of current Government: Vast Majority is keen on its early exit, but is split three ways in their approach; 34% favor street-politics, 28% favor struggle through parliament, 9% are uncertain on the approach. The remaining 27% do not favor early exit. GILANI POLL/GALLUP PAKISTAN

Islamabad November 4, 2011

The results of a Gilani Research Foundation Survey carried out by Gallup Pakistan revealed that views are divided on the future of current Government: Vast Majority is keen on its early exit, but is split three ways in their approach; 34% favor street-politics, 28% favor struggle through parliament, 9% are uncertain on the approach. The remaining 27% do not favor early exit.

In a survey a nationally representative sample of men and women from across the four provinces were asked “In your opinion, President Zardari’s government should continue or should it exit now?” Responding to this 27% believe that President Zardari’s government should continue whereas 71% believe that the current government should exit. However 2% did not give a view.

In a follow up question, those who favored change (71% of the sample) were asked to choose between two views, a view which favored street protests and another view favoring parliamentary means because of the fear that street politics may result in a military government. Responding to this, the respondents split into three groups: 34% favored street politics; 28% favored change through parliamentary means, while the remaining did not give a view. Thus on the whole the following picture emerged: 34% favored change of government through street politics; 28% through parliamentary means; 9% were uncertain on the exit approach; 27% did not favor early exit; 2% did not give a view.

Continued.....

Continued.....

Question: In your opinion, should the government of President Zardari's continue or should end now?		
Favor Early Exit		Oppose Early Exit
71%		27%
		2%
Question: (asked from those who said government should exit now) According to one view there should be street politics and protests to change the current government; according to another view such efforts should be made within elected Assemblies because otherwise the situation might produce a military government. What is your view?		
Favor Street Politics	Favor Struggle in Parliament	Uncertain
34%	28%	9%
