

Special Press Release Country Ratings

Nearly half (47%) Pakistanis perceive Pakistan's influence on the world as mainly positive. Globally, 58% say Pakistan's influence on the world is mainly negative.

Islamabad, July 11, 2017

According to a GlobeScan Survey conducted by Gallup Pakistan in Pakistan, nearly half (47%) Pakistanis perceive Pakistan's influence on the world as mainly positive. Globally, when the question was asked by GlobeScan in 18 other countries, 58% respondents say Pakistan's influence on the world is mainly negative. In terms of global comparison, Pakistan ranks as the third most negatively viewed country.

These findings have emerged out of a 19 country research conducted by GlobeScan. The study comprised internationally of 17,910 respondents surveyed between December 26, 2016 and April 27, 2017.

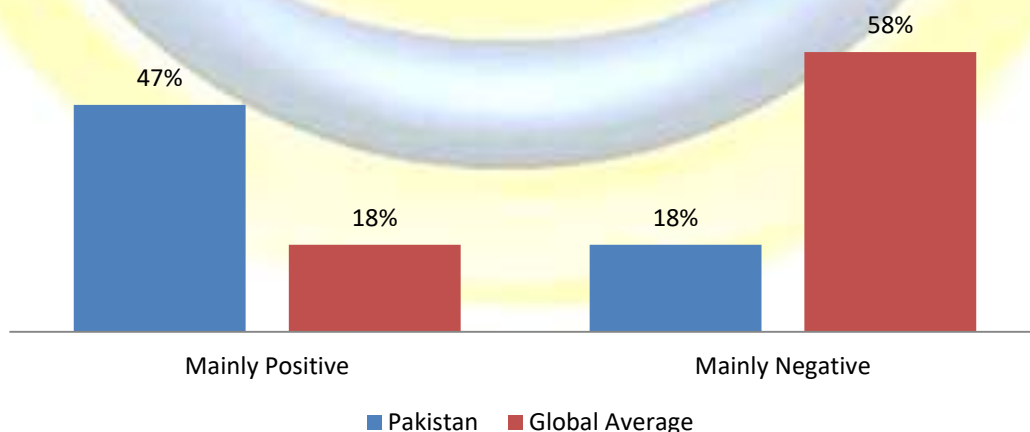

Pakistan: 47% Pakistanis said Pakistan's influence on the world is mainly positive

Respondents were asked the question, "Please tell me if you think each of the following countries is having a mainly positive or mainly negative influence in the world?" In response to this question, 47% said that Pakistan has a mainly positive influence, where as 18% said negative influence.

Global result: Globally, 58% of total respondents classified Pakistan's influence on the world as mainly negative; while 18% classified it as "mainly positive".

Positive views on Pakistan remain low but have improved by 2%, and negative views of its influence have decreased by 2 points since 2014. Despite being the third most negatively viewed country, it is no longer tying with Iran, which ranked last both in 2014 and 2017.

Question: "Please tell me if you think each of the following countries is having a mainly positive or mainly negative influence in the world?"

How other countries perceive Pakistan's influence by region:

Asia:

India: India delivered its most negative evaluation of the country since 2008, when it was 36% to 85% now in 2017. This is the largest rise of negative opinion from among all countries surveyed. Just 5% of Indians see Pakistan in a positive light in 2017, which indicates a drop by 12 points from 2014.

Indonesia: Indonesia has a more positive view of Pakistan's influence at 38%, which has remained stable since 2014. Negative opinions have decreased by 9 points to 22%.

China: In China, views have shifted from being largely negative in 2014 to being divided in 2017 following a 26-point increase in positive opinion to 47%, with negative views largely unchanged at 44%.

Australia: Opinions in Australia remain negative. However, there have been some small changes – negative perceptions have dropped by 14 points to 63%; similarly, positive perceptions have risen to 18%.

Europe:

United Kingdom: Negative opinions have fallen to 62%, while positive views have risen to 28% (up by 10 points).

France: Negative views have dropped to 72% in France, while positive views have increased by 6 points to 16%.

Germany: Germany has the lowest view of Pakistan's positive influence of all countries surveyed (1%) but negative opinion in Germany on Pakistan's influence in the world has also decreased more than in any other country since 2014, dropping 33 points from 80% to 47%.

Spain: In Spain, negative opinions have decreased by 12 points to 59%. This is the least negative that Spain has been about Pakistan's influence in the world since tracking began in 2008. Regardless, only 5% of Spanish respondents have a favourable view of Pakistan's role in the world. In doing so, Spain ties with India.

Greece: Figures are similar in Greece, where 4% view Pakistan's influence positively, and 58% view it negatively.

Turkey: In Turkey, public opinion is more positive, with 29% reporting a positive view of Pakistani influence in the world. However, an increasing number of Turkish respondents continue to offer a negative opinion, which has gone up by 7 points at 48% in 2017.

Russia: Russian opinion of Pakistan is generally negative at 40%. However, negative opinion has dropped by 13 points since 2004. Positive opinion, however, still remains very low, at just 10%.

North America:

U.S.: U.S. view of Pakistan's influence is mostly negative at 71%, however it is an improvement from 2014, when the U.S. reported a record high for negative attitudes towards Pakistan at 85%. There has also been a 9 point increase in its assessment of Pakistan's positive influence in the world (14% in 2017).

Canada: Canada's negative attitude towards Pakistan is marked at 67% (it was 79% in 2014) and like the U.S., its positive attitude is marked at 14%.

South America:

Mexico: Opinion in Mexico has plummeted since 2014. The country shows a 21-point increase in negative ratings to 65%, as well as a slight deterioration in positive opinion, which is now at 10%.

Brazil: In Brazil, there has been a six point increase in negative opinion, which has risen to 81% – second only to India. In fact, Brazil ties with India and Spain in regards to a positive attitude to Pakistan's influence in the world, merely achieving 5%.

Peru: Negative attitudes have gone up to 59% in Peru. On the other hand, positive views have remained relatively unchanged at 9%.

Africa:

Nigeria: Opinion has become more negative in Nigeria, where positive views have halved to 19% since 2014, and negative views have increased by 16 points to 62%.

Kenya: In Kenya, opinion has changed from leaning negative in 2014 (23% positive vs. 45% negative) to being divided in 2017 (36% positive vs. 35% negative).

Summary of Results:

Of the countries surveyed, 15 countries lean negatively in their opinion of Pakistan's influence in the world; two are divided in their opinion (Kenya and China); and only Indonesia shows positive attitude towards Pakistan. While perception of Pakistan's influence remains negative overall, there have been some shifts on a country-by-country basis. It has seen positive shifts with some countries and continued deterioration in others, such as in India, Nigeria, Brazil and Mexico.

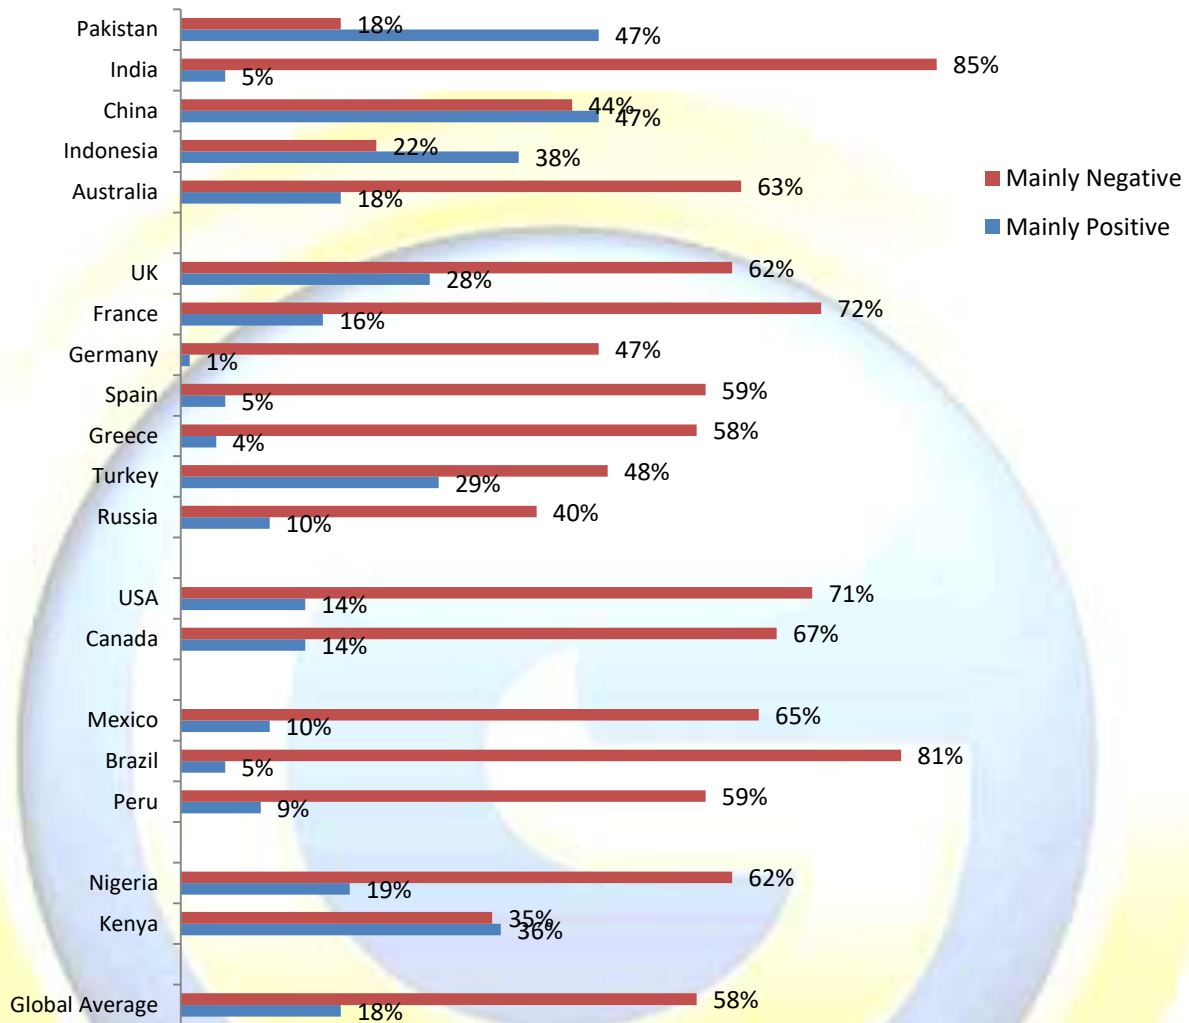

Global: Who had the most positive influence in the world? 61% said Canada

From among 15 countries (excluding Canada) and the EU, 61% respondents said they had a mainly positive view of Canada's influence in the world. Following Canada was Germany at 59% and Japan at 56%, as having the most positive influence. Canada also achieved the lowest share of negative influence in the world at 15%.

Global: Who had the most negative influence in the world? 61% said Iran

From among 16 countries and the EU, 61% respondents classified Iran as having the most negative influence in the world. Following Iran was North Korea at 59% and Pakistan at 58%. Only 15% of respondents had felt positively about Iran's influence in the world.

View of Pakistan's Influence by Country (2017)
