THIS IS A PRELIMINARY DRAFT

We are in the process of reviewing, cross-checking and revising/editing the material presented here. We will send you a revised version by email. Please feel free to use the revised version for any research and teaching purpose.

DISCLAIMER

The data pertain to 37 years of polling work. We have made much effort to standardize the samples and question wording wherever comparisons are made across years. However it still leaves room for improvement. We will join our readers in bringing greater refinement in all stages of research as we look ahead to future work on the same subjects.

LOOKING BACK AND LOOKING AHEAD

The basic purpose of this Roundtable and Report is to start a meaningful debate on the issue of Polling Research on Women, Family, Community and Society in Pakistan and identify avenues of further improvement. We admit that during the last 37 years we often asked inappropriate questions or did not maintain a time series as we should have. Moreover, our questions were not always informed by Relevant Experts knowledge. Hopefully in the future, we will frame more 'informed questions' in a more 'informed framework'.

While recognizing its limitations, what we have and present here, provides approximations to Perceptions on a wide variety of Social issues, which may otherwise be unavailable in a scientific fashion.

We present this to generate a constructive debate between Sociologists, Anthropologists and related Professionals working on Social Issues and Survey Researchers. The two can join hands to produce valuable Research and teaching materials for Concerned Professionals.

Introduction:

Pakistan is the sixth largest country of the world with a population of approximately 174 million.⁽¹⁾ Women constitute nearly 50% of the population. Family is an important institution of the society. According to Pakistan Demographic Health Survey (2006-07) average household consists of 7.2 persons.* The size of family is relatively smaller in urban areas (7 persons per household). Most (92%) of households are headed by a male member.⁽²⁾

A large proportion of the population is illiterate. The literacy level in age 15 and above is 50%. This is 63% for males and 36% for the female population. (2005 estimate)⁽¹⁾ Majority of the population lives in rural areas (64%).⁽¹⁾

Despite its large human resource, Pakistan is an under developed country with GDP per capita of \$26,00 which is on the rank 171 in the whole world.**⁽¹⁾ Unemployment is widespread (15% approximately). According to 2006 estimates, 24% of the population was living below the poverty line.⁽¹⁾

This document is based on Opinions of these Pakistanis spread across the four provinces.

We are presenting opinions on matters that are relevant to a common man. Individuals live together and form families. These families living together constitute a Community and these communities form the fabric of a Society. When individuals and Communities work as an Organized Force for constructing their Society, the Civil Society emerges.

In the page ahead, we will present opinions of individuals on issues of gender, family, living in a community and how these organized communities aspire to work for a Better Society. These are opinion of Pakistani Public and don not necessarily reflect the views of our institution or of the presenter.

* A Household is defined as a group of people (related or unrelated) living together who share cooking and eating of food.

** GDP per capita (PPP)

2. Pakistan Demographic and Health Survey (PDHS) 2006-07.

Overview:

This Report has four parts:

Part 1 is on opinions on Women and Gender issues. It covers women employment, women marriage, women rights, and gender characteristics etc. which form respective sections of this part.

Part 2 concerns polling on Family Issues. Views of the public on married life, family dynamics, sharing household chores and leisure time with family are discussed in this part.

Part 3 is about public opinions regarding Community Problems and issues. It gives opinions about community behavior, problems faced in the community and the country and what people think about life in general.

Part 4 tells us about public views on formation of Civil Society in the Country. It has sections on views on how poverty emerges, how people want to help their fellow beings, what is public perception about Foreign Aid and the role of Social Organizations in the society.

There is a note on Methodology at the end of this Report.

PART 1:

37 Years of Polling ON WOMEN ISSUES

- SECTION 1: VIEWS ON WOMEN EMPLOYMENT
- SECTION 2: VIEWS ON MARRIAGE
- SECTION 3: VIEWS ON WOMEN'S RIGHTS

Part 1: **37 Years of Polling on Women Issues**

SECTION 1:

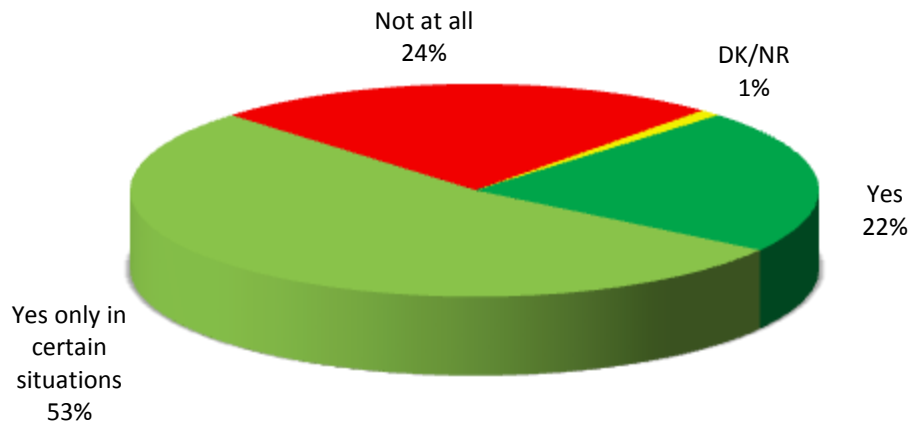

VIEWS ON WOMEN EMPLOYMENT

Majority of the people think that women should be allowed to work if they want, though under some conditions. Support for women working with women is higher than working in a mixed environment with men. Family is considered more important for women than employment. Under conditions where job opportunities are limited, most would like the men to be preferred to women for getting a job but still nearly one forth think that job decisions should be on merit irrespective of gender. These and other views on women employment are discussed in this Section.

Poor Economic Conditions (*poverty, gap between rich and poor, unemployment etc*) are viewed as the top threats which are killing a large number of children of the world.

HELPING THE CHILDREN OF THE WORLD

CHILDREN IN OTHER POOR COUNTRIES OF THE WORLD

Question: Each year approximately nine million under-five children and babies die, most of them from preventable diseases like malaria and pneumonia, or from hunger. The following questions refer to this as ‘preventable child death’. Do you think it is more important to end preventable child deaths in your own country, or in countries poorer than your own?

Source: Gallup & Gilani / National Survey, 2017

Comparative Data

	2009	2017
Your own country	24%	22%
Poorer than you own country	20%	35%
All are equally important	40%	33%
DK/NR	16%	10%

Source: Gallup & Gilani / National Survey, 2009 & 2017

35% say that it is more important to end preventable child death in countries poorer than Pakistan. 33% say it is equally important to end preventable child death both in our own country and in countries poorer than us. Only 22% say that we should only help children in our own country.

SECTION 5:

VIEWS ON FOREIGN AID

The Nations of the World have pledged to work together for the development of Mankind. One of the goals in the Millennium Development Goals (MDGs) is international collaboration for ending poverty, in equality, ignorance, disease and environmental destruction. Foreign Aid from the Developed Countries to help the poor of the developing countries is part of these efforts.

This section is about what are the public perceptions about Foreign Aid.

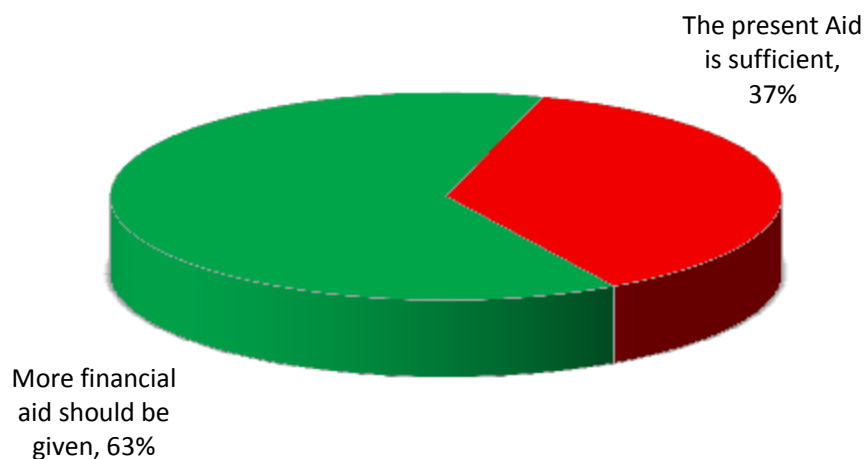

People want the Developed Countries to increase Humanitarian Aid for poor Countries. Majority says that the Aid would be mostly wasted before reaching the Poor of the Country.

Despite being a developing country, majority Pakistanis express the opinion that Pakistan should help the poor in other parts of the world as well in addition to poor in our own country.

FOREIGN AID

IDEAS ON FOREIGN AID

Question: Some countries of the world are rich and others are poor. Do you think that the rich countries should increase their financial aid for the poor countries or is the present amount sufficient?

Source: Gallup & Gilani / National Survey, 2017

Comparative Data

	2002	2003	2012	2017
More financial aid should be given	79%	85%	76%	63%
The present Aid is sufficient	19%	14%	21%	37%
DK/NR	2%	1%	3%	-

Source: Gallup & Gilani / National Survey, 2002, 2003, 2012 & 2017

FOREIGN AID

HOW MUCH WOULD BE WASTED?

Question: Suppose that the Rich countries of the world give Rs. 100 as an aid for the poor people of Pakistan. In your opinion, how much of the aid will be wasted before reaching the deserving poor people?

Source: Gallup & Gilani / National Survey, 2017

Comparative Data

	2009	2017
100% will be wasted	27%	21%
50% will be wasted	41%	39%
25% will be wasted	16%	28%
None will be wasted	5%	6%
DK/NR	11%	6%

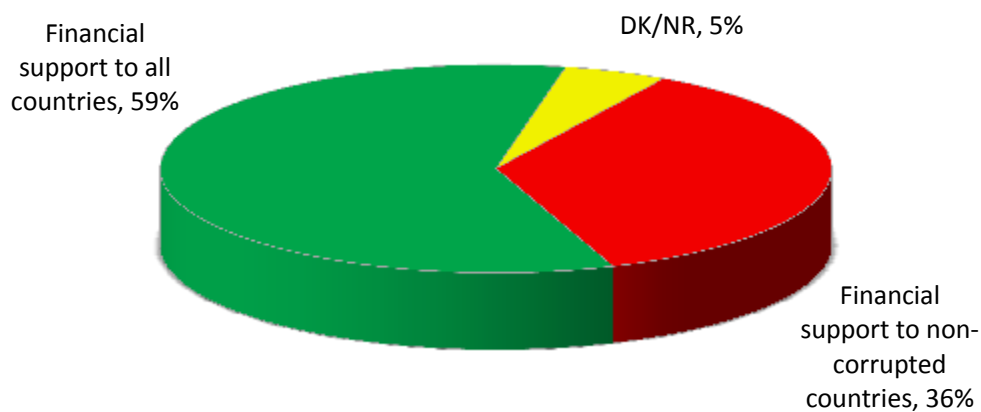

Source: Gallup & Gilani / National Survey, 2009 & 2017

Though majority says that the Foreign Aid by the Developed Countries to help the Poor Countries should increase. But when we ask people if this Aid is wasted before reaching the deserving poor people, majority agrees that most of the Aid is wasted.

FOREIGN AID

ALL COUNTRIES SHOULD BE HELPED DESPITE THEIR CORRUPTION

Question: I will read two statements. Please indicate which one do you favor?

Source: Gallup & Gilani / National Survey, 2017

Comparative Data

	2002	2003	2017
The developed countries should help only those poor countries which do not have corruption.	37%	35%	36%
Such steps should be taken that the poor people of the poor countries can be helped without taking their Governments/Administrative structures into consideration.	62%	63%	59%
DK/NR	1%	2%	5%

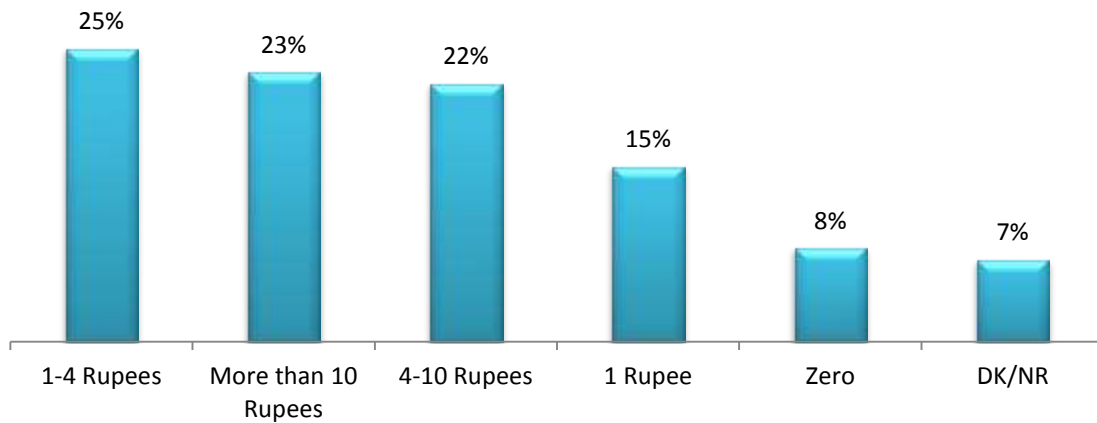

Source: Gallup & Gilani / National Survey, 2002, 2003 & 2017

Despite realization that Aid is wasted due to Corruption, still majority says that all Poor Countries should be helped by the Rich Countries.

FOREIGN AID

METHODOLOGY

METHODOLOGY

The results presented here are from multiple *nation wide house hold surveys* carried out by Gallup and Gilani over the last three seven decades (1980-2017)

- **SAMPLE PROFILE:**

The respondents in these surveys range from *1000-2500 men and women of age 18 years and above* spread across the *rural and urban* areas of the *four provinces* of the country. They represent different age groups, education status and socio economic profile.

Those which are urban only samples have been mentioned.

- **INTERVIEWING MODE:**

Face to Face, in-house interviews

- **SAMPLING METHODOLOGY:**

Multi-stage area probability sampling

- **SAMPLING TOLERANCE:**

Error margin is estimated to be $\pm 2-3\%$ at 95% Confidence level

- **WEIGHTING:**

The data have been weighted to correspond with census distribution of population for the rural and urban areas of all four provinces.

- **SURVEY DATES:**

The respective year in which these surveys were carried out has been mentioned at the bottom of all charts and tables.

- **VALUES/ PERCENTAGES:**

All values given in this report are percentages unless otherwise specified.

- **NOTE ON COMPARATIVE SECTIONS:**

Caution should be taken in interpreting results in comparative sections of the report. The purpose of having comparative data is to show a broad trend in timeline rather than providing a statistical difference in opinions. This caution is based on following major considerations:

- The exact question wordings may vary across the years where comparison is drawn
- The methodology and sample size may vary
- The timeline is not uniform, we have provided data at two or more points in time as available.
