CAUTION:

THIS IS A PRELIMINARY DRAFT

We are in the process of reviewing, cross-checking and revising/editing the material presented here. Please feel free to use the revised version for any research and teaching purpose.

DISCLAIMER

The data pertain to 38 years of polling work. We have made much effort to standardize the samples and question wording wherever comparisons are made across years. However it still leaves room for improvement. We will join our readers in bringing greater refinement in all stages of research as we look ahead to future work on the same subjects.

LOOKING BACK AND LOOKING AHEAD

The basic purpose of this Report is to start a meaningful debate on the issue of Polling Research on Society and Festivals in Pakistan and identify avenues of further improvement. We admit that during the last 38 years we often asked inappropriate questions or did not maintain a time series as we should have. Moreover, our questions were not always informed by Relevant Experts knowledge. Hopefully in the future, we will frame more 'informed questions' in a more 'informed framework'.

While recognizing its limitations, what we have and present here, provides approximations to Perceptions on a wide variety of Social issues, which may otherwise be unavailable in a scientific fashion.

We present this to generate a constructive debate between Sociologists, Anthropologists and related Professionals working on Social Issues and Survey Researchers. The two can join hands to produce valuable Research and teaching materials for Concerned Professionals.

METHODOLOGY

The results presented here are from multiple *nationwide house hold surveys* carried out by Gallup and Gilani over the last three eight decades (1980-2018)

- **SAMPLE PROFILE:**

The respondents in these surveys range from *1000-2500 men and women of age 18 years and above* spread across the *rural and urban* areas of the *four provinces* of the country. They represent different age groups, education status and socio economic profile

Those which are urban only samples have been mentioned.

- **INTERVIEWING MODE:**

Face to Face, in-house interviews

- **SAMPLING METHODOLOGY:**

Multi-stage area probability sampling

- **SAMPLING TOLERANCE:**

Error margin is estimated to be $\pm 2-3\%$ at 95% Confidence level

- **WEIGHTING:**

The data have been weighted to correspond with census distribution of population for the rural and urban areas of all four provinces.

- **SURVEY DATES:**

The respective year in which these surveys were carried out has been mentioned at the bottom of all charts and tables.

- **VALUES/ PERCENTAGES:**

Note: For more details on Methodology please refer to the Methodology Section

All values given in this report are percentages unless otherwise specified.

• **NOTE ON COMPARATIVE SECTIONS:**

Caution should be taken in interpreting results in comparative sections of the report. The purpose of having comparative data is to show a broad trend in timeline rather than providing a statistical difference in opinions. This caution is based on following major considerations:

- The exact question wordings may vary across the years where comparison is drawn
- The methodology and sample size may vary
- The timeline is not uniform, we have provided data at two or more points in time as available.
