HEALTH

A significant majority of Pakistanis (82%) consider themselves healthy, 15% say otherwise (Gallup Pakistan and WIN World Survey)

Islamabad, 08th May, 2020

According to a Gilani Research Foundation Survey carried out by Gallup & Gilani Pakistan, a significant majority of Pakistanis (82%) consider themselves healthy, 15% say otherwise.

A nationally representative sample of adult men and women from across the four provinces was asked the following question: *“How do you consider your overall health in general?”* In response to this question, 82% Pakistanis said they consider themselves healthy or very healthy, 15% believe they are unhealthy or somewhat healthy, 3% did not know or did not respond.

Global result: The question was also asked from respondents from 40 countries across the globe. Globally, 77% respondents consider themselves healthy or very healthy, 23% believe they are unhealthy or somewhat healthy. Poland (50%) and Honk Kong (41%) are the countries with the highest percentage of respondents considering themselves unhealthy, while Canada (95%) and Indonesia (93%) are the countries where percentage of citizens considering themselves healthy are the highest

Question: “How do you consider your overall health in general?”

Fieldwork in Pakistan conducted by Gallup Pakistan, the Pakistani affiliate of Gallup International Association (www.gallup-international.com; www.gallup.com.pk, www.gilanifoundation.com)

Note: This survey was conducted before the Coronavirus epidemic and does not represent views of people during ongoing lockdowns and isolation

The study was released by Gilani Research Foundation and carried out by Gallup & Gilani Pakistan, the Pakistani affiliate of Gallup International, as part of The WWS (WIN Worldwide Survey) conducted every year with the purpose to measure people's thoughts, expectations, worries, and perceptions related to relevant topics for society and business. A total of 29,575 people were interviewed globally. The fieldwork was conducted during October 2019 – December 2019. The margin of error for the survey is between 2.4 and 4.4 at 95% confidence level. The global average has been computed according to the covered adult population of the surveyed countries.
