6 in 10 Pakistanis believe that asymptomatic people cannot spread the coronavirus: Gallup & Gilani Pakistan

(Islamabad), February 19, 2021

According to a survey conducted by Gallup & Gilani Pakistan, 63% Pakistanis think that people who are asymptomatic cannot spread COVID-19.

A nationally representative sample of adult men and women from across the four provinces was asked the following question, “Do you feel that the people who don’t appear to be sick (as in they don’t have symptoms of coughing, sneezing or fever) can spread COVID-19?” In response to this question, 24% said ‘Yes’, 63% said ‘No’. 13% did not know/did not respond.

Question: “Do you feel that the people who don’t appear to be sick (as in they don’t have symptoms of coughing, sneezing or fever) can spread COVID-19?”

The study was released by Gilani Research Foundation and carried out by Gallup & Gilani Pakistan, the Pakistani affiliate of Gallup International. The recent survey was carried out among a sample of 1,080 men and women in urban and rural areas of all four provinces of the country, during December 24, 2020 – January 15, 2021. The error margin is estimated to be approximately $\pm 2-3$ percent at the 95% confidence level. The methodology used for data collection was phone interviews. Respondents hailed from over 100 districts of Pakistan.
