14% Pakistanis say that either they or their family member(s) have experienced restlessness in the last 7 days: Gallup & Gilani Pakistan

(Islamabad), April 30, 2021

According to a survey conducted by Gallup & Gilani Pakistan, 14% Pakistanis said that they or their family member(s) experienced restlessness in the last 7 days.

A nationally representative sample of adult men and women from across the four provinces was asked the following question, “*Have you or your family member(s) faced restlessness in the last 7 days?*” In response to this question, 14% said Yes, 78% said No while 8% gave no response.

Question: “Have you or your family member(s) faced restlessness in the last 7 days?”

All Pakistan

Gender Breakdown: Compared to males, 3% more females reported that they or their family members felt restless in the past 7 days

Data reveals that females are relatively more likely to report that they or their family members experienced restlessness in the last 7 days.

Age Breakdown: 50+ more likely to say that they or their family members experienced restlessness in the past 7 days

Disaggregating the data shows that 18% people who are 50+ report that they or their family members felt restless in the past week. This is higher compared to 15% of Pakistanis in the 30-50 age bracket and 12% who are under 30.

The study was released by Gilani Research Foundation and carried out by Gallup & Gilani Pakistan, the Pakistani affiliate of Gallup International. The recent survey was carried out among a sample of 1,590 men and women in urban and rural areas of all four provinces of the country, during March 19, 2021 – April 6, 2021. The error margin is estimated to be approximately $\pm 2-3$ percent at the 95% confidence level. The methodology used for data collection was phone interviews. Respondents hailed from over 100 districts of Pakistan.
