Urban residents are more likely to visit health facilities as compared to rural areas, showing health access issues: Gallup & Gilani Pakistan

(Islamabad), January 26, 2022

According to a survey conducted by Gallup & Gilani Pakistan, urban residents are more likely to visit health facilities as compared to rural areas, showing health access issues: Gallup & Gilani Pakistan.

A nationally representative sample of adult men and women from across the four provinces was asked the following question, “*May God bless everyone with health and wellness. Sometimes in case of sickness, you need to go to a doctor for consultation. Please tell us when did you last see a doctor or how many months have passed since you were examined by a doctor?*” In response to this question, 22% said 1 month, 11% said 2 months, 11% said 5-6 months, 3% said 7-12 months, 1% said more than 12 months. 35% of the respondents said they didn’t remember and 11% of respondents did not give an answer.

Question: “May God bless everyone with health and wellness. Sometimes in case of sickness, you need to go to a doctor for consultation. Please tell us when did you last see a doctor or how many months have passed since you were examined by a doctor?”
