63% Pakistanis still hold the opinion that the threat of coronavirus is exaggerated: Gallup & Gilani Pakistan

(Islamabad), February 9, 2022

According to a survey conducted by Gallup & Gilani Pakistan, 63% Pakistanis still hold the opinion that the threat of coronavirus is exaggerated.

Complete report for Wave 13 of the COVID-19 tracker survey can be accessed [here](#).

A nationally representative sample of adult men and women from across the four provinces was asked the following question, “Please tell us to what extent do you agree or disagree with the following statements? The risk of Coronavirus is not as much as it is being exaggerated?” In response to this question, 17% said strongly disagree, 11% said disagree to some extent, 27% said agree to some extent, 36% said strongly agree and 9% didn’t know or gave no response.

Urban-Rural Trend

Provincial Breakdown

Overall, it can be said that there is an increase in perception regarding the threat of COVID-19 being exaggerated across the board and an almost similar increase is observed across all provinces.

Provincial Trend

Note: Balochistan results were not consistent to be reported

The study was released by Gilani Research Foundation and carried out by Gallup & Gilani Pakistan, the Pakistani affiliate of Gallup International. The recent survey was carried out among a sample of 1865 men and women in urban and rural areas of all four provinces of the country, from December 22, 2021 - January 15, 2022. The error margin is estimated to be approximately $\pm 2-3$ percent at the 95% confidence level. The methodology used for data collection was CATI.
