2% Pakistanis report that they or someone in their household was diagnosed with Tuberculosis (TB); more rural residents as compared to urban residents claim to be suffering from TB: Gallup & Gilani Pakistan

(Islamabad), February 8, 2022

According to a survey conducted by Gallup & Gilani Pakistan, more rural residents as compared to urban residents claim to be suffering from TB.

A nationally representative sample of adult men and women from across the four provinces was asked the following question, *“Please tell us, God forbid, whether you or anyone in your household is suffering from the following diseases? - TB? (Please give only one answer)?”* In response to this question, 2% said yes, 89% said no, 3% didn’t know and 6% gave no response. According to the Pakistan Social and Living Standards Measurement Survey (PSLM) 2018-19, 1% or 2.1 million people said that they were diagnosed with Tuberculosis (TB) in the past year. 27% or 57 million Pakistanis did not know that Tuberculosis can be cured.

Question: “Please tell us, God forbid, whether you or anyone in your household is suffering from the following diseases? – TB”

The study was released by Gilani Research Foundation and carried out by Gallup & Gilani Pakistan, the Pakistani affiliate of Gallup International. The recent survey was carried out among a sample of 1865 men and women in urban and rural areas of all four provinces of the country, from December 22, 2021 - January 15, 2022. The error margin is estimated to be approximately $\pm 2-3$ percent at the 95% confidence level. The methodology used for data collection was CATI.
