10% of Pakistanis report knowing someone from their social circle who was re-infected by the coronavirus: Gallup & Gilani Pakistan

(Islamabad), April 12, 2022

According to a survey conducted by Gallup & Gilani Pakistan, 10% of Pakistanis report knowing someone from their social circle who was re-infected by the coronavirus.

Complete report for Wave 13 of the COVID-19 tracker survey can be accessed [here](#).

A nationally representative sample of adult men and women from across the four provinces was asked the following question, “Do you know anyone from your social circle or people that you meet who...? - Has previously been infected with COVID-19 and got infected with Coronavirus again” In response to this question, 10% said yes, 87% said no and 3% didn’t know or gave no response.

The study was released by Gilani Research Foundation and carried out by Gallup & Gilani Pakistan, the Pakistani affiliate of Gallup International. The recent survey was carried out among a sample of 1865 men and women in urban and rural areas of all four provinces of the country, from December 22, 2021 - January 15, 2022. The error margin is estimated to be approximately $\pm 2-3$ percent at the 95% confidence level. The methodology used for data collection was CATI.
