City Polls initiative of Gallup Pakistan

This poll is in a series of City-based polling that Gallup Pakistan is doing.

The purpose of this polling is to make sure that the city managers and city representatives are kept up to date with the will of the city residents. Much of the public policymaking, even at the city level, happens without hearing the preferences of the city residents. Through this series of polls, we wish to communicate to the government what the people of these cities really want.

We hope that the city policymakers and government will benefit from this series and there would be deliberation and debate on these issues in a constructive manner. Gallup Pakistan and its not-for-profit arm Gilani Research Foundation is keen to promote evidence-based policymaking in the country and one source of evidence is survey-based data creation which we have showcased in this survey and its report.

The initiative has been undertaken under the guidance of Bilal I Gilani, Executive Director Gallup Pakistan who can be contacted at bilal.gilani@gallup.com.pk

The study was released by Gilani Research Foundation and carried out by Gallup & Gilani Pakistan, the Pakistani affiliate of Gallup International. The recent survey was carried out among a sample of 482 men and women in urban and rural areas of all four provinces of the country, from December 22, 2021 - January 15, 2022. The error margin is estimated to be approximately $\pm 2-3$ percent at the 95% confidence level. The methodology used for data collection was CATI.
