From 2000-2022, there has been a 16% increase in the proportion of people who said that they or someone in their household was diagnosed with hypertension: Gallup & Gilani Pakistan History Project

(Islamabad), April 19th, 2023

In a Gallup & Gilani Pakistan National Survey conducted in the year 2000, a representative sample of adult men and women from across Pakistan was asked the following question, “Do you or any member of the household suffer from Hypertension (as diagnosed by a doctor)?” In response to this question, 27% said yes while 73% said no.

Comparative Picture: This question was asked again in 2022 to allow a comparison to be made across the years. In 2022, 43% said that someone in their household suffered from hypertension while 57% responded no.

Trend Analysis: From 2000 to 2022, there has been a 16% increase in the proportion of population diagnosed with hypertension.

This press release has been made as part of the Gallup Pakistan History Project which aims to release historical empirical polling data to wider audiences. The objective is to sustain and encourage empirical decision-making in Pakistan.

Question: “Do you or any member of the household suffer from Hypertension (as diagnosed by a doctor)?”

Aim and Rationale for Gallup Pakistan History Project

Bilal I Gilani, who is Executive Director at Gallup Pakistan, and the Director of Gallup Pakistan History Project explains the aim of the Project as follows: “Gallup Pakistan has been polling in Pakistan since 1979 (over 40 years). During this time, millions of Pakistanis have been surveyed by over a thousand interviewers

of Gallup. In 2014, Gallup Pakistan has decided to release historical Public Opinion data and this Press Release is part of Gallup Pakistan's History Project. This endeavor is dedicated to all those who hope for a more empirical understanding of Pakistani Issues". For more information about Gallup History Project, please contact caf@gallup.com.pk
