The study in Pakistan was conducted and released by Gallup Pakistan in collaboration with Dun & Bradstreet Pakistan as part of their quarterly Consumer Confidence Index Report. The recent survey was carried out among a sample of 1232 men and women in urban and rural areas of all four provinces of the country. The error margin is estimated to be approximately $\pm 2-3$ percent at the 95% confidence level. The methodology used for data collection was telephonic surveys (CATI)

About the Consumer Confidence Index Report

Consumer Sentiments are volatile and are shaped by consumers' perception of their personal financial situation as well as the overall financial and economic performance of the country. The Consumer Confidence Index (CCI Index) is a globally recognized instrument that serves as a leading indicator for household consumption and saving, which in turn is a key driver of overall economic activity in the country. To help businesses and policymakers better understand this crucial link, D&B and Gallup have collaborated to publish a quarterly report. The CCI is a valuable tool for multiple stakeholders, including governments, businesses, and financial institutions, as it enables them to gain a deeper understanding of the market and make informed decisions backed by data.

To learn more about past CCI publications, please visit the D&B Pakistan Knowledge Capital website or the website of Gallup Pakistan (Private) Limited.
