Gallup Pakistan Analysis of ECP Nomination Papers 2018

*Out of all the candidates who stood for elections in 2018, 7% had a criminal record- **Candidate Profile; Criminal Record– ECP Nomination Papers 2018***

Islamabad, January 8th, 2024

Gallup Pakistan, as part of its Big Data Analysis initiative, is looking at the occupation of candidates who stood for elections in 2018. This data is part of a publication called the 'ECP Nomination Papers 2018'.

The current edition looks at data from ECP Nomination Papers 2018, the dashboard can be found [HERE](#)

What is the Big Data Analysis Series by Gallup?

Gallup Pakistan's Big Data series was started by Bilal I Gilani, Executive Director of Gallup Pakistan. Bilal explains the rationale of the series: "The usual complaint from academics and policy makers is that Pakistan does not have data availability. Our experience negates that. Pakistan has lots of data, but it is not available in a usable form and not widely accessible. At Gallup we plan to bridge this gap in terms of accessibility and use of data. The Gallup Big Data series has earlier worked with data sets such as PSLM, Labour Force Survey, and Economic Survey reports as well as National Census Reports and Election Commission Data sets. The current series is using the Pakistan Demographic Survey, an annual compilation which seldom has data points not covered in many other reports. We hope that these series are useful, and we welcome both feedback as well as possible collaborations as we create a public good in the form of useful data sets in Pakistan."

What data points this current edition covers:

This series aims to present the important learnings from the Election Commission Pakistan Nomination Papers (2018) for the public. This edition looks at Candidate Profiles in terms of Criminal Record, in 2018. The series' main aim is to provide data. Implications of these data points for development sector as well as wider socio-political ramifications is something we would like to trigger in relevant circles.

Today's topic is "Criminal Record of candidates who stood for election in 2018"

Key Findings:

- 1) **National breakdown of candidates with criminal records:** Out of all the candidates who stood for elections in 2018, 7% had a criminal record.
- 2) **Provincial breakdown of candidates with criminal records:** Islamabad has the highest percentage of candidates with a criminal record, at 9%. On the other hand, FATA has the lowest, with 0%.
- 3) **Criminal offences by occupation:** Out of all the candidates who had a criminal record, most classified their occupation as "politician", at 12%.
