

Sources of Cooking in Punjab

Provincial Census
Report Punjab 2017

PRESS RELEASE

Gallup Pakistan Analysis of Provincial Census Report Punjab

Majority of the population utilized wood as their source of cooking fuel (57.85%) in 2017, followed by Gas (37.92%) – Sources of Cooking in Punjab– Provincial Census Report Punjab 2017

Islamabad, 24th July, 2024

Gallup Pakistan, as part of its Big Data Analysis initiative, is looking at sources of cooking in Punjab. This data is part of a publication called the ‘Provincial Census Report Punjab’.

The current edition looks at data from Provincial Census Report Punjab 2017, which can be found [HERE](#)

What is the Big Data Analysis Series by Gallup?

Gallup Pakistan’s Big Data series was started by Bilal I Gilani, Executive Director of Gallup Pakistan. Bilal explains the rationale of the series: “The usual complaint from academics and policy makers is that Pakistan does not have data availability. Our experience negates that. Pakistan has lots of data, but it is not available in a usable form and not widely accessible. At Gallup we plan to bridge this gap in terms of accessibility and use of data. The Gallup Big Data series has earlier worked with data sets such as [PSLM](#), [Labour Force Survey](#), and [Economic Survey reports](#) as well as [National Census Reports](#) and [Election Commission Data sets](#). The current series is using the [Provincial Census Report Punjab](#), which seldom has data points not covered in many other reports. We hope that these series are useful, and we welcome both feedback as well as possible collaborations as we create a public good in the form of useful data sets in Pakistan.”

What data points this current edition covers:

This series aims to present the important learnings from the Provincial Census Report Punjab, for policy makers, the public, as well as for marketers in an easy and understandable way. This edition looks at sources of cooking in Punjab. The series’ main aim is to provide data. Implications of these data points for development sector as well as wider socio-political ramifications is something we would like to trigger in relevant circles.

Sources of Cooking in Punjab

Provincial Census Report Punjab 2017

Cooking Fuel Used in 2017:

Majority of the population of Punjab utilized wood as their source of cooking fuel (57.85%) in 2017, followed by Gas (37.92%).

Comparison Between 1998 and 2017:

In 1998, 68.30% of the population utilized wood as their source of cooking fuel- which is 10.45% more than the percentage in 2017 (57.85%). However, this difference may be arising due to the uptake in the percentage of housing units utilizing gas in 2017 (37.92%), which increased by 20.25% since 1998 (17.67%).

Rural/Urban Breakdown:

As of 2017, significantly more housing units in rural areas appear to rely on wood (80.70%), with only 14.94% of the housing units utilizing gas. The opposite is true for urban areas, with 76.29% of the housing units relying on gas, and only 19.70% utilizing wood.

Wish to Contribute to Gallup Big Data Analysis?

Gallup Pakistan is looking for collaboration with researchers to expand both the Big Data Analysis project as well as this study of Provincial Census Report Punjab. If you have any ideas, please write to Bilal I Gilani, Project Director, Big Data Analysis at Gallup Pakistan.

Wish to know more about the Socio-Economic Indicators of Khyber Pakhtunkhwa at District Level?

The Population and Housing Census is the largest peace-time operation to obtain total population count and to collect benchmark data on socio-economic characteristics, which provide the basis for development planning of the province. The 6th Population and Housing Census was conducted in Punjab Province from 15th March to 24th May, 2017. The Pakistan Bureau of Statistics (PBS) completed the whole exercise with the strong support and active participation of the Provincial Government, the District Administration and the Armed Forces at all stages of data collection
