A large majority of Pakistanis (70%) live in a joint family; rural residents and adults aged 18 to 29 most likely to do so: Gallup & Gilani Pakistan

(Islamabad) 9th September, 2024

According to a survey conducted by Gallup & Gilani Pakistan, a large majority of Pakistanis (70%) live in a joint family. Survey findings highlighted rural residents as 13% more likely to be living in a joint family, as compared to urban residents. Adults aged 18 to 29 were the most likely (83%) of all age groups to be currently living in a joint family.

This press release is in a series of press releases Gallup Pakistan is producing on the subject of marriage and social behavior. You can access the previous press release in this series [here](#).

A nationally representative sample of adult men and women from across the country was asked the question, “Are you currently living in a joint family?” In response, 70% said ‘Yes’, and 30% said ‘No’.

Question: Are you currently living in a joint family?

The study in Pakistan was conducted and released by Gallup & Gilani Pakistan, the Pakistani affiliate of Gallup International. The recent survey was carried out among a sample of 755 men and women in urban and rural areas of all four provinces of the country, conducted from 28th June - 10th July 2024. The error margin is estimated to be approximately $\pm 2-3$ percent at the 95% confidence level. The methodology used for data collection was telephonic surveys (CATI).

Across rurality: 13% more rural residents reported living in a joint family, as compared to urban residents (62%).
