The study in Pakistan was conducted and released by Gallup & Gilani Pakistan, the Pakistani affiliate of Gallup International. The recent survey was carried out among a sample of 548 married men and women in urban and rural areas of all four provinces of the country, conducted from 28th June - 10th July 2024. The error margin is estimated to be approximately $\pm 2-3$ percent at the 95% confidence level. The methodology used for data collection was telephonic surveys (CATI).

Across rurality: There was no difference in the proportion of residents of each area who had gone on a honeymoon after their marriage, while there was only a minimal rural-urban difference in those who had not gone on a honeymoon. Urban residents were only 3% more likely than rural residents (75%) to not have gone on a honeymoon.
