Internet use in Pakistan on the rise: More than half (51%) of the population is now online, with men and urban residents outpacing others in usage: Gallup & Gilani Pakistan

(Islamabad) 13th December, 2024

According to a survey conducted by Gallup & Gilani Pakistan, more than half (59%) of the Pakistani population is now online, with men and urban residents outpacing others in usage.

A nationally representative sample of adult men and women from across the country was asked the question, “Please tell if you engaged in any of the following yesterday. Even if it was for a short time? - Used the internet” In response, 51% said ‘Yes’, 49% said ‘No’.

Question: Please tell if you engaged in any of the following yesterday. Even if it was for a short time? - Used the internet

The study in Pakistan was conducted and released by Gallup & Gilani Pakistan, the Pakistani affiliate of Gallup International. The recent survey was carried out among a sample of 1024 men and women in urban and rural areas of all four provinces of the country, conducted from 23rd October – 17th November 2024. The error margin is estimated to be approximately $\pm 2-3$ percent at the 95% confidence level. The methodology used for data collection was telephonic surveys (CATI).

Across gender: A higher percentage of men (57%) reported using the internet, compared to women (45%).
