46% Pakistanis Say Improving Drainage System Should Be Government's Top Priority to Mitigate Extreme Weather. (Gallup & Gilani Pakistan)

(Islamabad), 16th September 2025

According to a Gallup & Gilani Pakistan survey, 46% Pakistanis say improving drainage system should be government's top priority to mitigate extreme weather.

A nationally representative sample of adult men and women across the country was asked the question, ***"In your opinion, what measures should the government emphasize in the future?"***. In response, 46% of Pakistanis said that improving the water drainage system is the most important measure the government should emphasize to mitigate the impact of extreme weather events such as heavy rain and flooding. In addition, 27% of respondents prioritized conducting research on climate change, while 10% recommended training emergency response teams. Smaller proportions selected "other" responses (5%) or said "don't know/no response (12%).

The finding highlights rising public concern over climate impacts and calls for urgent government action on drainage infrastructure to better protect communities from extreme weather.

Question: In your opinion, what measures should the government emphasize in the future?
